## THE LAYMEN'S CONVENTION

The executive committee desire to ask the special co-operation of every Layman of the city for the remaining days, prior to the convention, in the interest of the delegates. There should be a very large representation from each church in the city if the good of the community is to be realized. In order to secure this registration at once, so as to make the proper provision for the opening session on Tuesday night, in K. of P. Armory there will have to be a very greatly increased number of workers in that line at once. For this reason the committee has arranged a special deputation for all of the prayer meetings tonight and a meeting at the Association building at the close of these services. No meeting of the convention will exceed in importance as this one tonight. There must be a large attendance to assure the success that the program arranged calls for. Every man, of all the churches, whether members of the executive committee or not is urged to attend this meeting. The latest addition to the program is the Methodist Sunday school orchestra, which will furnish music for the banquet Tuesday night. Everyone knows the quality of this organization and is full aware that this assures a splendid program of music. Prof. J. F. Mahaffy is director of the orchestra and takes special pride in furnishing strictly high grade programs.

## Are Drugs Necessary? Do Drugs Cure Disease? Can Nature be Assisted?

If people were born right and afterwards lived right, there would be no use for medicine. Every doctor knows this. So do other well-informed people.

One thing more. When a person lives wrongly, or acquires bodily weakness by heredity, medicine can do only very little. Medicine cannot cure him. Only charlatans claim that medicines will cure disease. Medicines may palliate symptoms. Medicines may urge the powers of Nature to resist disease. Medicines sometimes arouse the efforts of the human body to right itself against derangements. This is the most that medicine can do.

A man accidentally puts his finger in the fire. Instinctively he wets his finger in his mouth, then blows on it for the cooling effect. This is no cure. He knows it very well. But it makes it feel better for the time being.

People eat unwisely. This produces dyspepsia or indigestion. The only rational cure is to eat correctly. Yet if a palliative is at hand the pains of indigestion can be mitigated, the throes of dyspepsia assuaged. The medicine cannot be said to have cured. It simply palliates disagreeable symptoms. The cure must come through right living.

Take Peruna, for instance. No one claims Peruna is a cure for dyspepsia. But Peruna will stimulate the stomach to perform its function properly. Peruna will increase the flow of digestive fluids, without which digestion cannot be carried on at all. It will increase the relish of food, the appetite.

It is admitted that all this can be accomplished by right living, but there are so many people who either will not or do not know how to eat correctly that a tremendous amount of good can be done by the wise use of Peruna.

A stomach that has been frequently abused performs the function of digestion very lazily. Such a stomach allows the food to remain undigested for some time after it is swallowed. This leads to fermentation of the food. Sour stomach is the result. This goes on week after week, until the blood is poisoned with the products of fermentation. This condition is very apt to produce rheumatism.

It is not claimed that Peruna will cure rheumatism. Nothing will cure rheumatism but correct living. But it is claimed that Peruna will assist a badly abused stomach to perform its work.

If a person would correct his habits, persist in right eating and temperate ways, undoubtedly the stomach would right itself, the blood would rid itself of the poison, and everything would be right. But as said before there are a multitude of people who will not or cannot adopt right methods of living. To such people Peruna is a boon. A dose before meals will assist the stomach to do its work. This prevents fermentation of the food, brings about normal digestion, and all the train of ills that follow indigestion disappear.

In other words, Peruna is helpful to those who live badly, or those who have acquired some chronic weakness. Peruna does not cure, but it assists the powers of Nature to bring about a cure. The whip does not increase the power of the horse to pull a load, but judiciously used it stimulates the horse to use his powers at the right time, without which he could not have pulled the load.

This illustrates the effect of Peruna, or any other good remedy upon the system. Taken at the right time, it calls forth the powers of the human system to meet the encroachments of disease, and thus ends short, if not entirely ends, the diseased action.

No one should ever attempt to substitute medicine in the place of right living. In the end such an attempt will prove a disaster. But an occasional use of the right medicine at the right time is a godsend, and no reasonable person will undertake to deny it.

Those who know how to use Peruna find it of untold value. By and by the world will get wise enough so that through correct living no medicine at all will be needed. But that time has not arrived. In the meantime, while the world is approaching that perfection in which all medicine will be eliminated, Peruna is a handy remedy to have in the house.

Slight derangements of the stomach, slight catarrhal attacks of the liver, the throat, bronchial tubes, lungs or bowels; these attacks are sure to lead to grave diseases, and can be averted by the judicious use of Peruna.

Wouldn't you like to read a few unsolicited testimonials from people who have used Peruna, and who stand ready to confirm the above statements concerning it. If so, address the Peruna Drug Manufacturing Co., Columbus, Ohio, and we will send some prepaid.
